

What is actually costs to run our 21 year old Class A Motorhome

There are many variables but this chart can help you identify if you want to approach it on the budget you have to work with.

These things will impact your costs:

- How many trips you make and the distance of each from home. \$2.85 per km plus \$38 per night in 2025.
- If you cannot or will not do your own maintenance, servicing, and repairs, you have to pay someone else to do them. To have a shop do a simple oil change type service runs \$250+ for our rig (RV and generator). It is about \$75 if I do it. A big diesel pusher rig will be near \$1,000 in a shop. Yes, an oil change is usually only once a year but good troubleshooting and diagnostic skills are essential to being able to use your rig all season long because shops are booked months ahead.
- Do you have to drive at or above the posted speed limits? Speed costs money. An RV is shaped like a brick: an 8½ foot wide 12+ foot high brick. And it is heavy. Ours weighs about 25,000 lbs including the car. Wind resistance alone means you burn twice the fuel at 120kph as you do at 80kph. 90kph is a good speed.
- Your driving record can increase your insurance premium. Again, speed costs money!
- If you have talked yourself into a new(er) RV, you will have monthly payments (even when it is parked for the winter).
- You probably need a storage yard. Storage yards cost money. Fully secure yards with lights, cameras, paved surface, and so on cost a lot more. And your catalytic converter will still get stolen like ours did! We pay about \$1 per day for a nearby fenced compound with 24-hour access. Shop around.
- It costs more money if you stay at an RV Resort instead of an RV park or campground or, heaven forbid, a Walmart! I would never say one RV lifestyle is better than another. You need a \$400 per night waterfront site, fully fenced and landscaped with furniture, gas fireplace and your own hot tub for your 45' Prevost? With a \$3.5 million coach you can clearly afford it so I say go for it. If you are looking to camp for free on Crown land in your well-loved tent trailer, good for you, have a great time. Most of us are someplace in between and you can find your spot on the spectrum too.

Enough editorializing – on the next page are our actual numbers for the last 26 years. Things like fuel, maintenance & repairs, and camping fees vary greatly. Remember to save up for big ticket items - the cost of 7 new tires (we have a spare) is \$3,500+ every 7 years or an uninsured motorhome windshield at \$2,000 per side.

Take a look at the other documents in this section to get a better feel for the costs or various types of RV.

I have not included depreciation, or cost of borrowing which may or may not apply in your situation.

Cheap holiday? No. But at under \$200 per night all-in, it is cheaper than flying and renting a car, paying for hotels, and buying several meals out every day, each. And you get to see so much more and change your plans at the last minute.
